

Sign Up For Your Clubroot Soil Test Today

DNA-based testing can be used to detect low levels of the clubroot pathogen. Early detection and proactive clubroot management strategies can be used to keep spore levels low and minimize yield losses.

To encourage testing, SaskCanola and the Ministry of Agriculture are offering fall clubroot soil testing to producers across the province. Taking part in this program has value for you as an individual producer, and also provides value for your fellow Saskatchewan canola producers. The \$100-value of this test is covered by SaskCanola.

Sign up to receive your test by:

- Following the QR code at right;
- Calling SaskCanola at 306-975-0262;
- Contacting your local Saskatchewan Association of Rural Municipalities Plant Health Officer or RM office;
- Visiting a Ministry of Agriculture regional office; or
- Calling the Agriculture Knowledge Centre at 1-866-457-2377.
